ORDINANCE NO.

AN ORDINANCE of the City of Federal Way, Washington, relating to Public Transportation Facilities; amending FWRC 19.05.120, 19.05.200, and 19.105.020; and adding new sections to Chapters 19.225 and 19.240 FWRC. (Amending Ordinance Nos. 17-834, 15-804, 09-630, 09-610, 09-593, and 97-295)

WHEREAS, the City of Federal Way ("City") recognizes the need to periodically modify Title 19 of the Federal Way Revised Code ("FWRC"), "Zoning and Development Code," in order to conform to state and federal law, codify administrative practices, clarify and update zoning regulations as deemed necessary, and improve the efficiency of the regulations and the development review process; and

WHEREAS, this ordinance, containing amendments to development regulations and the text of Title 19 FWRC, has complied with Process VI review, Chapter 19.80 FWRC, pursuant to Chapter 19.35 FWRC; and

WHEREAS, it is in the public interest for the City Council to adopt a new permitted land use for the City Center Core (CC-C) and Commercial Enterprise (CE) zones and establish development regulations for Light Rail or Commuter Rail Transit Facilities within the City; and

WHEREAS, the Central Puget Sound Regional Transit Authority ("Sound Transit") is proceeding to implement their Sound Transit 3 ("ST3") light rail system expansion, with two light rail stations planned within the City; and

WHEREAS, the Federal Way Link Extension ("FWLE") portion of ST3 is currently under construction, with a new light rail station being built at the Federal Way Transit Center ("FWTC") in the CC-C zone; and

WHEREAS, the planned parking facility expansion, designed to accommodate the new added demand from light rail users at the FWTC, has not yet been constructed; and

WHEREAS, the Tacoma Dome Link Extension ("TDLE") is currently in the planning phase; and

WHEREAS, a preferred alternative route alignment and station location has been identified by Sound Transit in the CE zone in South Federal Way; and

WHEREAS, the demand for parking for transit-related parking proximate to the new stations will occur as soon as the stations are in operation; and

WHEREAS, there are no public parking facilities available to accommodate the parking demand created by the transit stations; and

WHEREAS, the proposed use is already generally allowed in the City as an essential public facility; and

WHEREAS, the City's comprehensive plan vision, goals and policies strive to ensure transit station areas develop into efficient transportation centers that serve all travel modes, including cars; and

WHEREAS, adding Light Rail or Commuter Rail Transit Facilities to the City's development regulations will help ensure that stations are developed in a complete and functional manner, not piecemeal; and

WHEREAS, the City's measurement of transit level of service ("LOS") considers the provision of adequate parking at transit stations to be necessary in order to meet minimum LOS standards; and

WHEREAS, an Environmental Determination of Nonsignificance ("DNS") was properly issued for the Proposal on August 27, 2021, and no appeals were received and the DNS was finalized on October 1, 2021; and

WHEREAS, an Addendum To Environmental Determination of Nonsignificance ("DNS") was properly issued on February 1, 2022, to incorporate minor modifications to the zone charts for City Center Core (CC-C) and Commercial Enterprise (CE), and an added definition for Transit Station; and

WHEREAS, the Planning Commission properly considered these code amendments on September 15, 2021, and forwarded a recommendation of approval to the City Council; and

WHEREAS, the Land Use & Transportation Committee of the City Council considered these code amendments on October 4, 2021, and recommended adoption of the text amendments as recommended by the Planning Commission; and

WHEREAS, the City Council properly conducted a duly noticed public hearing on these code amendments on February 15, 2022, and March 1, 2022.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF FEDERAL WAY, WASHINGTON, DO ORDAIN AS FOLLOWS:

<u>Section 1</u>. <u>Findings</u>. The City Council of the City of Federal Way makes the following findings with respect to the proposed amendments.

- (a) The above recitals are hereby restated and adopted as findings.
- (b) These code amendments are in the best interest of the residents of the City and will benefit the City as a whole by ensuring that transit stations are developed in a complete and functional manner, become an amenity to the people they serve, and do not burden local businesses and communities.

Ordinance No. 22-____

- (c) These code amendments comply with Chapter 36.70A RCW, the Growth Management Act.
- (d) These code amendments are consistent with the intent and purpose of Title 19 FWRC and will implement and are consistent with the applicable provisions of the Federal Way Comprehensive Plan.
- (e) These code amendments bear a substantial relationship to, and will protect and not adversely affect, the public health, safety, and welfare.
- (f) These code amendments have followed the proper procedure required under the FWRC.
- Section 2. Conclusions. Pursuant to Chapter 19.80 FWRC and Chapter 19.35 FWRC, and based upon the recitals and the findings set forth in Section 1, the City Council makes the following Conclusions of Law with respect to the decisional criteria necessary for the adoption of the proposed amendments:
- (a) The proposed FWRC amendments are consistent with, and substantially implement, the following Federal Way Comprehensive Plan goals and policies:
- **NEG12** Promote land use patterns and transportation systems that minimize air pollution and greenhouse gas emissions.
- **TP6.4** The City will continue to cooperate with regional and local transit providers to develop facilities that make transit a more attractive option.
- **CCG9** Provide a balanced transportation network that accommodates public transportation, high occupancy vehicles, pedestrians, bicyclists, automobiles, and integrated parking.
- **CCG15** Work with transit providers to develop a detailed HCT plan for the City Center. Identify facilities, services, and implementation measures needed to make transit a viable and attractive travel mode. Tailor the plan to meet local needs through rapid transit, express buses, and/or demand-responsive service.

CCP29 Integrate the high capacity transit system with other transportation modes serving Federal Way and the region.

CCP33 Encourage public and private parking structures (below or above ground) in lieu of surface parking. As redevelopment occurs and surface parking becomes increasingly constrained, consider a public/private partnership to develop structured parking in the downtown commercial area.

CCP34 Encourage the provision of structured parking.

(b) The proposed FWRC amendment bears a substantial relationship to the public

health, safety, and welfare because it will ensure that transit stations are developed as complete

and effective public facilities, with a greater ability to provide the public with a faster, safer, and

cleaner mode of transportation, while reducing congestion on the public roadways.

(c) The proposed amendment is in the best interest of the public and the residents of

the City of Federal Way because it helps to ensure that transit stations are developed in a

complete and functional manner, becoming a multi-modal amenity to the people they serve.

Section 3. FWRC 19.05.120 is hereby amended to read as follows:

19.05.120 L definitions.

"Land division" means any process by which individual lots, parcels, or tracts are created for the

purpose of sale, lease, or transfer. Land divisions include, but are not limited to, conventional

subdivisions (both short and long plats), binding site plans, cluster subdivisions, cottage housing,

zero lot line townhouse development, and small lot detached development.

"Landscaping" means the planting, removal and maintenance of vegetation along with the

movement and displacement of earth, topsoil, rock, bark and similar substances done in

conjunction with the planting, removal and maintenance of vegetation.

"Landward" means toward dry land.

"Legal nonconformance" means those uses, developments, or lots that complied with the zoning regulations at the time the use, development, or lot was created or established, but do not conform with current zoning regulations. This definition shall be applied to legal nonconforming

lots, uses, and developments as defined in this chapter.

"Light rail or commuter rail transit facility" means a structure or other improvement of a

regional light rail or commuter rail transit system, which includes ventilation structures, traction

power substations, utilities serving the regional transit system, transit stations and related

passenger amenities, bus layover and inter-modal passenger transfer facilities, parking garages,

park and rides, tunnel portals, storage track and support facilities, and transit station access

facilities.

"Linear frontage of subject property" means the frontage of the subject property adjacent to all

open, improved rights-of-way other than Interstate 5. If the subject property is not adjacent to an

open, improved right-of-way, "linear frontage" means the frontage of the subject property on any

public access easements or tracts which serve the subject property and adjacent unopened and/or

unimproved rights-of-way.

"Lobby" means a central hall, foyer, or waiting room at the entrance to a building.

"Lot" means a parcel of land, of sufficient area to meet minimum zoning requirements, having

fixed boundaries described by reference to a recorded plat, to a recorded binding site plan, to

metes and bounds, or to section, township and range.

"Lot area" means the minimum lot area per dwelling unit based on the underlying zone. For

single-family lots, the area of a vehicular access easement, private tract, flagpole, or access

panhandle shall not be credited in calculation of minimum lot area.

"Low density use" means a detached dwelling unit on a subject property that contains at least

five acres.

"Low density zone" means the following zones: SE and comparable zones in other jurisdictions.

"Low impact development (LID)" means a stormwater management strategy that emphasizes

conservation and use of existing features integrated with distributed, small-scale stormwater

controls to more closely mimic natural hydrologic patterns in residential, commercial, and

industrial settings.

<u>Section 4</u>. FWRC 19.05.200 is hereby amended to read as follows:

19.05.200 T definitions.

"Temporary personal wireless service facility" means a personal wireless service facility which

is to be placed in use for a limited period of time, is not deployed in a permanent manner, and

does not have a permanent foundation.

"Tenant improvement" means any work, improvement or remodeling completely within the

interior of a building necessary to meet the varied requirements of continuing or succeeding

tenants.

"Threshold determination" means the decision by the responsible official (the community

development services director) whether or not an environmental impact statement (EIS) is

required for projects that are not categorically exempt under the State Environmental Policy Act

(SEPA).

"Topping" means a pruning cut to the main stem of a mature tree. Such cuts can result in serious

decay and/or forcing out growth of weakly attached upright sprouts below the cut. Topping also

results in permanent alteration of tree architecture. For purposes of this chapter, topping shall be

treated the same as tree removal.

Ordinance No. 22-____

Page 7 of 17 Rev 1/21 LU "Topsoil" means the uppermost strata of soil containing a large percentage of organic materials

and which is capable of providing suitable nourishment for vegetation.

"Townhouse" means a type of attached multifamily dwelling in a row of at least two such units

in which each unit has its own front and rear access to the outside, no unit is located over another

unit, and each unit is separated from any other unit by one or more vertical common fire-resistant

walls. See definition of "dwelling unit, townhouse."

"Trade school" means a post-secondary institution that trains persons for qualification in

specific trades or occupations, i.e., mechanics; construction trades such as carpentry, HVAC, and

wiring; electronics repair and service including computers; plumbing; chefs and culinary

training; upholstery; bartending.

"Traffic control devices" means signs, signals, stripes and other mechanical or graphic items

which control the flow, direction or speed of vehicular and pedestrian traffic.

"Transit Station" means an off-street at-grade, under-, or above-street-level rail or light-rail,

ferry terminal, bus hub, or bus transfer facility for stopping of transit vehicles to pick up and

drop off passengers. A transit station usually has boarding/alighting platforms, waiting area(s),

fare collection, information, and related facilities.

"Transparent glass" means windows that are transparent enough to permit a reasonable level of

visibility of the activities within a building from nearby streets, sidewalks and public spaces.

"Tree" means any self-supporting perennial woody plant characterized by one main stem or

trunk of at least six inches in diameter measured four and one-half feet above ground, or a multi-

stemmed trunk system with a definite crown, maturing at a height of a least 20 feet above ground

level.

"Tree unit" is a measurement to give value to the number of trees retained on a site. Table 19.120.130-2 assigns tree unit credits based upon the size of the existing or newly planted trees. For new trees, tree units vary depending on the size that the trees will reach at maturity (smaller size at maturity, fewer tree unit credits).

"Trees, deciduous" means trees that shed or lose their foliage at the end of the growing season.

"Trees, evergreen" means trees that retain their leaves for more than one growing season.

Section 5. FWRC 19.105.020 is hereby amended to read as follows:

19.105.020 Essential public facilities.

- (1) Generally. The review and siting of essential public facilities shall conform to the following:
 - (a) Class I facilities shall be reviewed <u>under the zoning provisions found in their respective</u> zoning districts, as well as the special provisions outlined in subsection (2) of this section.

 Review of Class I facilities shall be under process IV, hearing examiner decisionunder process IV, hearing examiner decision. Project review shall also include those special provisions outlined in subsection (2) of this section.
 - (b) Class II facilities shall be reviewed under the zoning provisions and processes found in their respective zoning districts, unless they are found to be exempt under the Federal Fair Housing Act, in which case such exemption does not imply an exemption from applicable building or structural standards.
- (2) Site evaluation criteria. The following criteria will be utilized in evaluating siting proposals made by sponsoring agencies or organizations seeking to site Class I essential public facility in Federal Way. These criteria encompass an evaluation of regional and/or local need and local site suitability for the proposed facility. Findings concerning the proposal's conformance with each criteria shall be included in the documentation of any city decision relative to the project.

Ordinance No. 22-____

(a) *Demonstration of need*. Project must establish the need for their proposed facility. Included in the analysis of need should be the projected service population, an inventory of existing and planned comparable facilities, and an assessment of demand for this type of

essential public facility.

(b) Relationship of service area to population. The facility should service a share of Federal

Way's population within the city. The proposed site should also be in a location that

reasonably serves its over-all service area population.

(c) Minimum site requirements. Project sponsors shall submit documentation showing the

minimum site requirement needs for the facility. Site requirements may be determined by any

or all of the following parameters: Minimum size of the facility, access, necessary on-site

support facilities, topography, geology and soils and mitigation requirements. The sponsor

shall also identify any future expansions of the facility.

(d) Alternative site selection. The sponsor shall document whether any alternative site have

been identified that meet the minimum site requirements of the facility. Where a proposal

involves expansion of an existing site, the documentation should indicate why relocation of

the facility to another site would be infeasible.

(e) Concentration of essential public facilities. In considering a proposal, the city shall

examine the overall concentration of these facilities within the city to avoid placing undue

burden on any one neighborhood.

(f) Public participation. Sponsors shall conduct local outreach efforts with early notification

to prospective neighbors to inform them about the project and to engage local residents in

site planning and mitigation design prior to the initiation of formal hearings.

(g) *Proposed impact mitigation*. The proposal must include adequate and appropriate mitigation measures for the impacted area and neighborhood. Mitigation measures may include, but are not limited to, natural features that may serve as buffers, other site design elements used in the development plan, and/or operational or other programmatic measures contained in the proposal. The proposed measures should be adequate to substantially reduce or compensate for anticipated adverse impacts on the local environment.

Section 6. Chapter 19.225 Sections is hereby amended to read as follows:

Chapter 19.225

CITY CENTER CORE (CC-C)¹

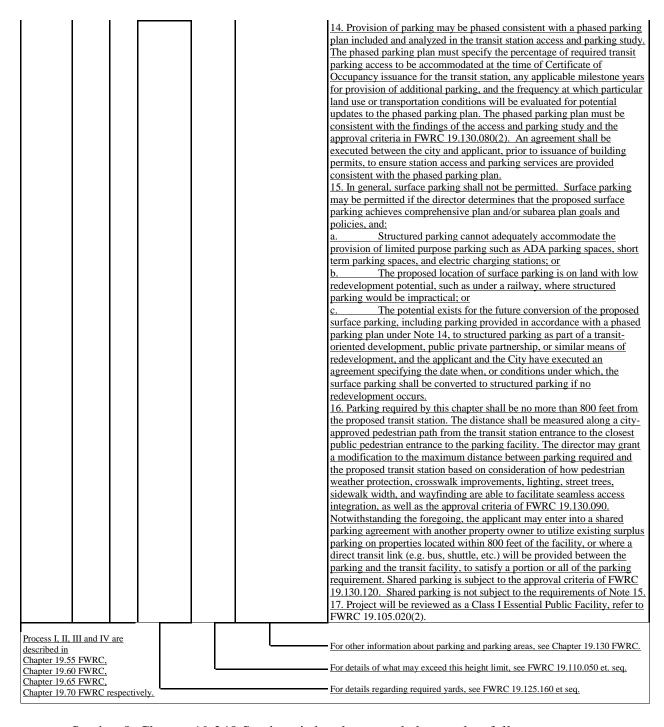

Sections: 19.225.010 Office use. 19.225.015 Breweries, distilleries, and wineries. 19.225.020 Retail use. 19.225.030 Retail shopping center, regional. **19.225.040** Entertainment. 19.225.050 Hotel, convention or trade centers. 19.225.060 Parking garages. 19.225.070 Multifamily dwelling units, senior citizen, or special needs housing. 19.225.080 Hospital – Convalescent centers – Nursing homes. 19.225.090 Schools – Day care facilities, commercial. 19.225.100 Government facility, public parks, public transit shelter. 19.225.105 Public transportation facilities. 19.225.110 **Public utility.** 19.225.120 Personal wireless service facility. 19.225.130 Churches. 19.225.140 Urban agriculture.

Section 7. Chapter 19.225 of the Federal Way Revised Code is hereby amended to add a new section 19.225.105 to read as follows:

19.225.105 Public transportation facilities.

The following uses shall be permitted in the commercial enterprise (CE) zone subject to the regulations and notes set forth in this section:

structures will not significantly impact adjacent properties. 5. The subject property must be designed so thruck parking, loading, and maneuvering areas; areas where noise generating outdoor uses and activities may occur, and vests and similar features are located as far as possible from any residential zone, conforming residential use, or natural systems. 6. The streets, utilities, and other infrastructure in the area must be adequate to support the proposed development. 7. No maximum lot, coverage applies, Instead, the buildable area will be determined by other site development regulations; i.e., required yards, landscaping, surface water facilities, etc. 8. For regulations pertaining to outdoor use, activity and storage, refer to FWRC 19.125.170. 9. For community design requirements that apply to the project, see Chapter 19.115. FWRC. 10. For landscaping requirements that apply to the project, see Chapter 19.125. FWRC. 11. Eor sign requirements that apply to the project, see Chapter 19.125. FWRC. 12. For other provisions of this chapter that may apply to the project, see Chapter 19.125. FWRC. 13. A reduction to the minimum required parking spaces may be allowed provised a transit sistion access and parking study is submitted as part of the development application for City-issued land use approval to inform any devisions regarding the restluction of parking. The scope of the study may include, but is not limited to the existing supply, utilization, and availability that parking sepaces may be allowed provised a transit sition access and parking supply. utilization, and availability and availability likely to result from any interin or alternative station access and parking secantion. The direction of the study may include but is not limited to the existing supply, utilization, and availability and availability likely to result from any interin or alternative station access and parking secantion. The direction of the minimum number of parking secantion. The direction of the minimum of parking study is							
S. The subject property must be designed so that truck parking, loading, and maneuvering areas; areas where noise genting outdoor uses and activities may occur and vents and similar features are located as far as possible from any residential zone, conforming residential use, or natural systems. 6. The streets, utilities, and other infrastructure in the area must be adequate to support the proposed development. 7. No maximum lot coverage applies. Instead, the buildable area will be determined by other sits development regulations, i.e., required yards, landscaping, surface water facilities, etc. 8. For regulations pertaining to outdoor use, activity and storage, refer to FWRC 19.125.170. 9. For community design guidelines that apply to the project, see Chapter 19.15 FWRC. 10. For landscaping requirements that apply to the project, see Chapter 19.125 FWRC. 11. For sign requirements that apply to the project, see Chapter 19.125 FWRC. 12. For other provisions of this chapter that may apply to the subject property, see Chapter 19.65 FWRC. 13. A reduction to the minimum required parking study is submitted as part of the development application for City-issued land use approval to inform any decisions regarding the reduction of parking. The scope of the study may include, but is not limited to: the existing supply, utilization, and availability of publicly accessing the value are property, see Chapter 19.26 for publicly accessing the reduction of parking. The scope of the study may include, but is not limited to: the existing supply, utilization, and availability ing availability likely to result from any interim or alternative station access and parking study and the approval criteria in FWRC 19.130.08002. The director may grant, after consultation with the City Traffic Engineer, a modification to the minimum number of parking study and the approval criteria in FWRC 19.130.08002. An agreement which palancing a number of the passed parking plan included and analyzed in the transit station access and parking s							
and maneuvering areas: areas where noise generating outdoor uses and activities may occur; and wents and similar features are located as far as possible from any residential zone, conforming residential use, or natural systems. 6. The streets, utilities, and other infrastructure in the area must be adequated to support the proposed development. 7. No maximum lot coverage applies. Instead, the buildable area will be determined by other site development regulations per legal to the proposed of the proposed development. 8. For regulations pertaining to outdoor use, activity and storage, refer to FWRC 19.125.170. 9. For community design guidelines that apply to the project, see Chapter 19.115 FWRC. 10. For landscaping requirements that apply to the project, see Chapter 19.125 FWRC. 11. For other provisions of this chapter that may apply to the subject property. see Chapter 19.126 FWRC. 12. For other provisions of this chapter that may apply to the subject property. see Chapter 19.265 FWRC. 13. A reduction to the minimum required parking spaces may be allowed provided a transit station access and parking study is submitted as part of the development application for City-issued and use approvid to inform any decisions regarding the reduces and parking study is submitted as part of the development application for City-issued and use approvid to inform any decisions regarding the reduces of the study may include, but is not limited to: the existing supply, utilization, and availability of publicly accessible on-street and off-street parking, projected changes to train the design and include the part of the study and the approval of the study and the approval content in the part of the parking squardine that the result of the transit station with the City Traffic Pelnicle rip generation), and area pathing availability for publicly accessible on-street and off-street parking plan must specify the percentage of required transit parking access to be accommodated at the time of Certificate of Occupancy issuance for							
activities may occur; and vents and similar features are located as far as possible from any residential zone, conforming residential use, or natural systems. 6. The streets, utilities, and other infrastructure in the area must be adequate to support the proposed development. 7. No maximum lot coverage applies, Instead, the buildable area will be determined by other site development regulations, i.e., required yards, landscaping, arriface water facilities, etc. 8. For regulations pertaining to outdoor use, activity and storage, refer to PWRC 19, 125, 170. 9. For community design guidelines that apply to the project, see Chapter 19, 115 PWRC. 10. For landscaping requirements that apply to the project, see Chapter 19, 125 PWRC. 11. For sign requirements that apply to the project, see Chapter 19, 125 PWRC. 12. For other provisions of this chapter that may apply to the subject property, see Chapter 19, 265 PWRC. 13. A reduction to the minimum required parking spaces may be allowed provided a transit station access and parking study is submitted as part of the development application for; issued land use approval to inform any decisions regarding the reduction of parking. The scope of the study may include, but is not limited to: the existing supply, utilization, and availability of publicly accessible on-street and offstreet parking, projected changes to transity, scenarios. The director may grant, after consultation with the City Traffic Engineer, a modification to the minimum mumber of parking search so. The director may grant, after consultation with the City Traffic Engineer, a modification to the minimum number of parking spaces based upon the result of the transit station access and parking study and the approval criteria in PWRC 19, 300,800(2). 14. Provision of parking may be phased consistent with a phased parking plan included and analyzed in the runsit station, any applicable milestone vens for provision of additional parking, and the frequency at which particular land use or transportation condi							
possible from any residential zone, conforming residential use, or natural systems. 6. The streets, utilities, and other infrastructure in the area must be adequate to support the proposed development. 7. No maximum lot coverage applies. Instead, the buildable area will be determined by other site development regulations, i.e., required yards, landscaping, surface water facilities, etc. 8. For regulations pertaining to outdoor use, activity, and storage, refer to FWRC 19.125.170. 9. For community design guidelines that apply to the project, see Chapter 19.115.FWRC. 10. For landscaping requirements that apply to the project, see Chapter 19.125.FWRC. 11. For sign requirements that apply to the project, see Chapter 19.125.FWRC. 12. For other provisions of this chapter that may apply to the subject property, see Chapter 19.265.FWRC. 13. A reduction to the minimum required parking spaces may be allowed provided at runsit station access and parking study is submitted as part of the development application for City-issued land use approval to inform any decisions regarding the reduction of parking. He scope of the study may include, but is not limited to: the existing supply, utilization, and availability of publicly accessible on-street and off-street parking, projected changes to transit fidership, traffic (vehicle trip generation), and area parking availability filely to result from any interim or alternative station access and parking scenarios. The director may grant, after consultation with the City Traffic Engineer, a modification to the minimum number of parking spaces based upon the result of the transit station access and parking study and the approval criteria in FWRC 19.130.080(2). 14. Provision of parking may be phased consistent with a phased parking plan included and analyzed in the transit station, any applicable milestone vears for provision of additional parking, and the frequency at which particular land use or transportation conditions will be evaluated for potential updates to the phased parking p							
6. The streets, utilities, and other infrastructure in the area must be adequate to support the proposed development. 7. No maximum lot coverage applies. Instead, the buildable area will be determined by other site development regulations, i.e., required yards, landscaping, surface water facilities, etc. 8. For regulations pertaining to outdoor use, activity and storage, refer to FWRC 19.125. T/07. 9. For community design guidelines that apply to the project, see Chapter 19.115 FWRC. 10. For landscaping requirements that apply to the project, see Chapter 19.125 FWRC. 11. For sign requirements that apply to the project, see Chapter 19.125 FWRC. 12. For other provisions of this chapter that may apply to the subject property, see Chapter 19.226 FWRC. 13. A reduction to the minimum required parking spaces may be allowed provided a transit station access and parking study is submitted as part of the development application for City-issued land use approval to inform any decisions regarding the contion of parking. The scope of the study may include, but is not limited to: the existing supply, utilization, and availability of publicly accessible on-street and off-street parking, projected changes to transit radorship, tradific (vehicle trip generation), and area parking availability likely to result from any interim or alternative station access and parking study and the approval criteria in FWRC 19.130.080(2). 14. Provision of parking may be phased consistent with a phased parking study. The phased parking shall not be required transit station access and parking study and the approval criteria in FWRC 19.130.080(2). 14. Provision of parking may be phased consistent with a phased parking stand vand the approval criteria in FWRC 19.130.080(2). 15. Provision of parking may be phased consistent with a phased parking stand vand the approval criteria in FWRC 19.130.080(2). 16. Provision of parking stand parking stand parking stand parking stand parking stand and the approval criteria in FWRC 19.130.080(2). 17.							
adequate to support the proposed development. Z. No maximum lot coverage applies. Instead, the buildable area will be determined by other site development regulations, i.e., required yards, landscaping, surface water facilities, etc. 8. FWRC. 12. For other provisions of this chapter that may apply to the subject property, see Chapter 19.265 FWRC. 13. A reduction to the minimum required parking spaces may be allowed provided a transit station access and parking study is submitted as part of the development application for City-issued land use approval to inform any decisions regarding the reduction of parking. The scope of the study may include to: the existing supply, utilization, and availability of publicly accessible on-street and offstreet parking, projected changes to transit ridership, traffic Cheicle trip generation), and area parking availability likely to result from any interim or alternative station access and parking scenarios. The director may grant, after consultation with the City Traffic Engineer, a modification to the minimum number of parking spaces based upon the result of the transit station access and parking study and the approval criteria in FWRC 19.130.080(2). 14. Provision of parking may be phased consistent with a phased parking plan included and analyzed in the transit station access and parking plan included transit parking access to be accommodated at the time of Certificate of Occupancy issuance for the transit station, any applicable milestone years for provision of additional parking, and the frequency at which particular land use or transportation conditions will be evaluated for potential updates to the phased parking plan. The phased parking plan must be consistent with the findings of the access and parking study and the approval criteria in FWRC 19.130.080(2). An agreement shall be executed between the city and applicant, prior to issuance of building permits, to ensure station access and parking services are provided consistent with the phased parking plan. The phased parking and policies and: 15. In general, surface parking shall not be permitted. Surface parking may be permitted if the director determines that the proposed surface parking achieves comprehensive plan and/or subarea plan goals and poli							
12. For other provisions of this chapter that may apply to the subject property, see Chapter 19.265 FWRC. 13. A reduction to the minimum required parking spaces may be allowed provided a transit station access and parking study is submitted as part of the development application for City-issued land use approval to inform any decisions regarding the reduction of parking. The scope of the study may include, but is not limited to: the existing supply, utilization, and availability of publicly accessible on-street and offstreet parking, projected changes to transit ridership, traffic (vehicle trip generation), and area parking availability likely to result from any interim or alternative station access and parking scenarios. The director may grant, after consultation with the City Traffic Ingineer, a modification to the minimum number of parking spaces based upon the result of the transit station access and parking study and the approval criteria in FWRC 19.130.080(2). 14. Provision of parking may be phased consistent with a phased parking plan included and analyzed in the transit station access and parking path granting tradity. The phased parking plan included and analyzed in the transit station access and parking study. The phased parking plan included and malyzed in the transit station, any applicable milestone years for provision of additional parking, and the frequency at which particular land use or transportation conditions will be evaluated for potential updates to the phased parking plan. The phased parking plan must be consistent with the findings of the access and parking study and the approval criteria in FWRC 19.130.080(2). An agreement shall be executed between the city and applicant, prior to issuance of building permits, to ensure station access and parking services are provided consistent with the phased parking plan. 15. In general, surface parking shall not be permitted. Surface parking may be permitted if the director determines that the proposed surface parking achieves comprehensive plan a							
property, see Chapter 19.265 FWRC. 13. A reduction to the minimum required parking spaces may be allowed provided at transit station access and parking study is submitted as part of the development application for City-issued land use approval to inform any decisions regarding the reduction of parking. The scope of the study may include, but is not limited to: the existing supply, utilization, and availability of publicly accessible on-street and offstreet parking, projected changes to transit ridership, traffic (vehicle trip generation), and area parking availability likely to result from any interim or alternative station access and parking scenarios. The director may grant, after consultation with the City Traffic Engineer, a modification to the minimum number of parking spaces based upon the result of the transit station access and parking study and the approval criteria in FWRC 19.130.080(2). 14. Provision of parking may be phased consistent with a phased parking plan included and analyzed in the transit station access and parking study. The phased parking plan must specify the percentage of required transit parking access to be accommodated at the time of Certificate of Occupancy issuance for the transit station, any applicable milestone years for provision of additional parking, and the frequency at which particular land use or transportation conditions will be evaluated for potential updates to the phased parking plan. The phased parking plan must be consistent with the findings of the access and parking plan must be consistent with the findings of the access and parking plan must be consistent with the findings of the access and parking plan must be consistent with the findings of the access and parking and the approval criteria in FWRC 19.130.080(2). An agreement shall be executed between the city and applicant, prior to issuance of building permits, to ensure station access and parking may be permitted if the director determines that the proposed surface parking achieves comprehensive plan and/or s							
allowed provided a transit station access and parking study is submitted as part of the development application for City-issued land use approval to inform any decisions regarding the reduction of parking. The scope of the study may include, but is not limited to: the existing supply, utilization, and availability of publicly accessible on-street and offstreet parking, projected changes to transit ridership, traffic (vehicle trip generation), and area parking availability likely to result from any interim or alternative station access and parking scenarios. The director may grant, after consultation with the City Traffic Engineer, a modification to the minimum number of parking spaces based upon the result of the transit station access and parking study and the approval criteria in FWRC 19,130,080(2). 14. Provision of parking may be phased consistent with a phased parking plan included and analyzed in the transit station access and parking plan included and analyzed in the transit station access and parking plan included and analyzed in the transit station, any applicable milestone years for provision of additional parking, and the frequency at which particular land use or transportation conditions will be evaluated for potential updates to the phased parking plan. The phased parking plan must be consistent with the findings of the access and parking study and the approval criteria in FWRC 19,130,080(2).
